

June 24, 2024

The Honorable Patty Murray  
Chair  
Committee on Appropriations  
U.S. Senate  
Washington, D.C. 20510

The Honorable Tom Cole  
Chair  
Committee on Appropriations  
U.S. House of Representatives  
Washington, D.C. 20515

The Honorable Susan Collins  
Vice Chair  
Committee on Appropriations  
U.S. Senate  
Washington, D.C. 20510

The Honorable Rosa DeLauro  
Ranking Member  
Committee on Appropriations  
U.S. House of Representatives  
Washington, D.C. 20515

Dear Chairman Murray, Chairman Cole, Vice Chair Collins and Ranking Member DeLauro,

Chronic workforce shortages are the top challenge facing roofing industry employers across the U.S. as demographic trends make it ever more difficult to find qualified candidates for well-paying, family-sustaining jobs. Increased funding for career and technical education (CTE) is essential to providing strategies and tools to help employers address future workforce development needs.

The roofing industry represents tens of thousands of companies, hundreds of thousands of workers and billions of dollars of economic firepower. The entire supply chain – from raw materials to product manufacturing to jobsite installation – creates one of the most significant economic multipliers in the U.S. construction industry.

As Congress considers federal appropriations for FY 2025, the roofing industry supports increased funding for Perkins Career and Technical Education State Grants, which provide funding for CTE programs operated at the state and local levels. This funding is critical to high schools, community colleges, small businesses and the students who need training to help close the skills gap in today’s workforce in both manufacturing and the construction trades. Perkins CTE State Grants are allocated to all 50 states to invest in CTE efforts critical to employers and students and expanding economic growth within the state.

The roofing industry was pleased to support enactment of the Strengthening Career and Technical Education for the 21st Century Act in 2018. Implementation of this law has reformed and expanded CTE programs, and it is vital that Congress provide sufficient funding for it to be successful in helping employers meet their workforce needs.

In recent years, congressional appropriations for CTE have not kept pace with growing demand despite the importance of these programs to sustaining economic growth. As such, we urge Congress to give higher priority to investments in this crucial area in the FY 2025 budget. CTE provides access to opportunities for students who want to develop skills, increase their knowledge, and contribute to their communities by pursuing a rewarding career.

Over the past half-century policies that support college bound students have been promoted – from the GI Bill to subsidized student loans. At the same time support for trade schools and their students has not been as robust, leading to fewer students going into the trades. This lack of support is one of the primary reasons that a disproportionate number of the open jobs today are for skilled tradespeople.

The roofing industry supports a robust increase of 5% or more over the FY 2024 level for Perkins State Grants. This funding is critical to providing students with the resources and opportunities they need to excel in their studies and help ensure our nation has the skilled workforce necessary for the future.
